

## *Cultural Immersion*

Our goal with Feed the World expeditions are to engage your teenagers (13-18 years old) in a unique experience that fosters their humanitarian spirit. By giving back to many local communities, your children can immerse themselves in foreign cultures and learn to see life from a different point of view. Our youth expeditions include experienced chaperons who teach:

- **Responsibility**
- **Leadership**
- **Appreciation**
- **Values**

## *Making a difference*

Our youth expeditions provide safe, yet powerful experiences that teach lessons which cannot be learned from a textbook. As your children learn how we teach rural fathers and mothers in third world countries to provide for their families, they will be offered the opportunity to experience the gift of service and widen their perspective on the world.

Included with your expedition are sightseeing excursions where you will experience some of Ecuador's amazing culture & the natural beauty that makes this country a true paradise.
